

2018 Corn Plant Stand Assurance Program

Program Description:

The **2018 Corn Plant Stand Assurance Program** is designed to ensure growers the opportunity to achieve a positive return when applying FMC brand products at-plant on Bt, seed-treated, or conventional corn. Capture® LFR® Insecticide, Capture® LFR® Insecticide + VGR™ Soil Amendment or Capture® 3RIVE 3D™ Insecticide applied for soil pests improves plant stands and optimizes yields by reducing injury from insects and improving overall plant health for maximum yield potential. Ethos® XB Insecticide/Fungicide, in patented LFR® formulation, combines proven insect control with antifungal activity for suppression against seedling damping off diseases caused by *fusarium*, *pythium*, *phytophthora* and *rhizoctonia*, while Temity™ LFR® Insecticide/Fungicide controls *rhizoctonia*. Corn rootworm continues to impact seedling establishment. If FMC brand products applied at planting time do not show a return on investment through increased stands, FMC will either return the difference based on a plant stand count between the treated acres and the untreated check up to the product cost **or** retreat with an FMC product where applicable.
